Qom &ndash; Bibliography of Shiite History compiled by the institute of history and conduct of Ahlulbayt was published by Islamic Sciences and Culture Academy (ISCA) publications as select bibliography of Shiite History.

According to the office of scientific and international cooperation the work consisting of 408 pages and eight parts was coauthored by Mustafa Sadiqi and Hujjatulislam Hamid Qara&rsquo;ati.

&ldquo;Bibliography of Shiite History was compiled to render research services to scholars and students of this discipline (Shiism). It introduces some 600 Persian and Arabic book titles&rdquo;, said one of the authors.

&ldquo;Given that disciplines related to Shiite studies and Shiite history have been established in recent years at universities and seminaries, the publication of such books seems to be very necessary&rdquo;, said Mustaf Sadiqi.

&ldquo;It consists of eight parts including an introduction, general history, political history, culture and civilization, history of religious sects, local history, on personalities and social history&rdquo;, he added.
